linkedin.com/in/balamurugangopal

Targeting senior Technical Project Manager / Delivery Manager roles leveraging expertise in project delivery, SDLC governance, UI architecture, Agile methodologies, stakeholder management, risk mitigation, and AI-enabled application delivery.

## PROFILE SUMMARY

- **Technology & Delivery Leadership:** Technology professional with 20 years of experience spanning front-end engineering, UI architecture, enterprise application development, and technology delivery management, combining deep technical expertise with project and delivery leadership.
- **Project Portfolio & Delivery Management:** Oversees 12 concurrent projects, coordinating 3–4 teams and delivery activities involving approximately 35 people, with a focus on delivery priorities, milestones, risk mitigation, dependencies, and stakeholder alignment.
- **End-to-End Project Governance:** Coordinates delivery across the complete Software Development Life Cycle (SDLC), from planning, requirements gathering, and analysis through execution, testing, release management, hypercare, and production support, leveraging Agile/Scrum practices and structured escalation management.
- **Technical Leadership & POC Execution:** Led a ground-up proof of concept (POC) to establish a unit-testing capability, conducting R&D and tool evaluation, setting up the testing environment, integrating the selected tool, and developing initial use cases before transitioning further development to junior engineers.
- **AI-Enabled Project Delivery & Productivity:** Managed delivery of an AI-enabled application initiative leveraging AWS Bedrock, coordinating with development teams and overseeing project progress, documentation, Jira updates, reporting, and stakeholder communications.
- **AI-Driven Project Management Productivity:** Leveraged Claude, ChatGPT, Jira Rovo, and Microsoft Copilot for Outlook to streamline project reporting, documentation, Jira updates, and stakeholder communications, achieving an estimated 50% reduction in personal effort on routine project management activities.
- **Cross-Functional Leadership & Capability Development:** Experienced in coordinating across 18 cross-functional teams and mentoring 14+ engineers across relevant assignments, with strengths in stakeholder engagement, technical problem-solving, knowledge transfer, and engineering process improvement.
- **Delivery Excellence & Measurable Impact:** Focuses on delivery governance, risk management, operational efficiency, and continuous improvement, with reported achievements including a 90% reduction in CI/CD and deployment failures, a 30% reduction in product development timelines, and a 200% improvement in team productivity.

## CORE COMPETENCIES

- Technical Project & Delivery Management
- Agile Project & Sprint Management
- Risk Assessment & Mitigation
- Project Portfolio & Delivery Oversight
- Business Requirements & Scope Management
- Release & Change Management
- SDLC Governance & Execution
- Project Estimation & Scheduling
- AI Project Delivery & Process Optimization

## SOFT SKILLS

- Strategic Thinking & Problem-Solving
- Conflict Resolution & Negotiation
- Analytical Thinking
- Decision-Making & Prioritization
- Adaptability & Flexibility
- Accountability & Ownership

## TECHNICAL SKILLS

- **Front-End Technologies:** Angular 7/9/11/17, React 18, JavaScript, TypeScript, HTML5, CSS3
- **Architecture & Design:** UI Architecture, Solution Architecture, Enterprise Application Design
- **Backend & Cloud:** Node.js, AWS, Microservices, Cloud Deployment
- **DevOps & CI/CD:** CI/CD, Jenkins, Git
- **AI Tools:** Claude, ChatGPT, Jira Rovo, Microsoft Copilot for Outlook
- **Project Management Tools:** Jira, Confluence
- **Methodologies:** Agile, Scrum, Waterfall, SDLC

## EDUCATION

- **Master of Computer Applications (MCA)** – SVN College, Madurai
- **Bachelor of Science (B.Sc.) in Computer Science** – Kamaraj College, Thoothukudi

## CERTIFICATION

- **Certified ScrumMaster (CSM)**
- **DNIIT** – NIIT

## WORK EXPERIENCE

**Genpact Private Limited | Senior Technical Lead / UI Architect / Technical Project Manager**
*January 2024 – Present*

- **Project & Delivery Management:** Managing **12 concurrent projects**, overseeing end-to-end project delivery, sprint execution, capacity planning, risk mitigation, dependency tracking, and release governance.
- **Cross-Functional Team Leadership:** Coordinating **3–4 cross-functional teams**, aligning priorities, resolving delivery bottlenecks, managing escalations, and driving execution against project milestones.
- **Technical Solution Coordination:** Collaborating with product owners, solution architects, and engineering teams to translate business requirements into technical deliverables, implementation plans, and actionable project roadmaps.
- **UI Architecture & Front-End Engineering:** Guiding UI architecture and front-end engineering initiatives using Angular, JavaScript, TypeScript, and React to facilitate technical discussions, evaluate implementation approaches, and resolve technical challenges.
- **AI Project Delivery:** Managing an AI-enabled application development project built on **AWS Bedrock**, coordinating project planning, stakeholder communication, dependencies, risks, and delivery milestones.
- **AI-Driven Productivity Optimization:** Leveraging Claude, ChatGPT, Jira Rovo, and Microsoft Copilot to streamline project reporting, documentation, status updates, and email communication, achieving an estimated **50% reduction in personal effort** for routine project management activities.
- **Stakeholder & Escalation Management:** Driving stakeholder alignment and issue resolution by tracking action items, escalating delivery blockers to functional managers, and establishing clear ownership and accountability.
- **SDLC & Release Governance:** Overseeing project execution across the Software Development Life Cycle (SDLC), facilitating sprint planning, technical estimation, risk reviews, release readiness, and delivery tracking.

**Operative India Private Limited | Principal Software Engineer**
*December 2019 – September 2023*

- **Technical Leadership & Mentorship:** Spearheaded application modernization and engineering improvement initiatives while mentoring **14 engineers**, strengthening technical capabilities and team productivity.
- **Front-End & Cloud Development:** Developed front-end solutions using Angular and contributed to AWS-based application development and microservices implementations.
- **CI/CD & Deployment Optimization:** Optimized CI/CD pipelines and deployment processes, reducing integration and deployment failures by **90%** through process improvements and pipeline enhancements.
- **Agile Project Delivery:** Managed end-to-end project delivery across **2 Scrum teams**, overseeing sprint execution, release planning, stakeholder communication, risk tracking, and delivery commitments.
- **Cross-Functional Collaboration:** Facilitated Agile planning and engineering coordination to resolve technical dependencies, maintain delivery momentum, and align execution with business priorities.

**Alten Calsoft Labs Pvt. Ltd. | Senior Technical Lead**
*June 2013 – November 2019*

- **Application Modernization:** Led the migration of a legacy ExtJS application to Angular, transitioning the application toward a modern, component-based front-end architecture.
- **Technical Leadership & Client Delivery:** Directed technical implementation and customer-facing deliveries, coordinating development priorities, resolving technical challenges, and maintaining stakeholder alignment.
- **Multi-Project Delivery Management:** Managed and delivered **3 concurrent projects**, achieving **99% on-time delivery** through proactive planning, dependency management, and execution oversight.

**Sakhatech Information Systems Pvt. Ltd. | Technical Lead**
*May 2009 – April 2013*

- **MMOG Application Development & Technical Leadership:** Led the technical development and delivery of Massive Multiplayer Online Games (MMOGs), coordinating development activities and ensuring alignment with functional and technical requirements.
- **Technical Coordination & Delivery Management:** Coordinated development teams, tracked project deliverables, and resolved technical issues to support application quality, timely delivery, and client expectations.

**Flip Design Pvt. Ltd. | Senior Web Developer**
*August 2006 – April 2009*

- **Web Application Development:** Developed and maintained web applications throughout the development lifecycle, enhancing application functionality and maintainability.
- **Game Development:** Developed and delivered Flash-based games for web and mobile platforms, creating interactive user experiences across multiple delivery environments.
- **Development Process Improvement:** Improved development workflows and execution efficiency to support timely delivery of web applications and gaming solutions.

## PERSONAL DETAILS

- **Location:** Bengaluru, Karnataka
- **Languages Known:** English
